DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 14-16,25-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are directed towards a "method of controlling the full color LED based lighting control," but the method steps recited do not clearly recite any such control as a result.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 25 (to the extent understood) is rejected under 35 U.S.C. 102(e) as being fully met by Kim (USP 6686529).

Kim discloses a method and apparatus for converting color to sound. See Col. 2 lines 4-54.

Claims 1-13,17-24 are allowable.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haase (USP 6927331), Paist (USP 5784096), Hata (USP 5402702), Martel (USP 5070399), Snively (USP 4928568), Williams (USP 4355348) are further cited to show related teachings in the art.
